Southwark Metal Training

Join Us for this Important Training

Presented by John Lemm of Southwark Metal

DATE: Tuesday, December 9, 2025

TIME: 8:00 AM - 12:00 PM

LOCATION: Geary Pacific Supply
795 Lindsay Blvd
Idaho Falls, ID 83402
Phone: 208-522-0400

COST: FREE!

Introduction to Air Distribution and Duct Design

With an end goal of having a better understanding of the importance of a properly designed air distribution system, this four-hour module will serve as an introduction to industry accepted procedures for HVAC system design described in the code-cited ACCA design manuals. Starting with a breakdown of the Manual J Speedsheet (an Excel-based worksheet created by ACCA), we will look at the pertinent information needed for a basic load calculation. Accurate load calculation is essential to help determine the heating and cooling requirements of a residence, and to overall duct system design. Additional duct design parameters such as friction rate and duct size calculator usage will help attendees leave with a basic knowledge of these critical design elements needed to populate a Manual D Speedsheet and begin the process of appropriately sizing duct work in a residential application.
