Are Here to HELP YOU!!

Geary Pacific Supply is your Indoor Air Quality SOLUTIONS PROVIDER!

Are you looking for ways to build value with your customers without the smoke and mirrors? Are you looking for ways to grow your recurring revenue and increase your maintenance members? Are you trying to expand your team's knowledge when it comes to Indoor Air Quality? We offer proven solutions and in-depth quality training, ensuring that you and your team are fully confident when you recommend a Indoor Air Quality repair in the home.

VENTILATION SYSTEMS

Choosing the right ventilation system for your needs is becoming increasingly challenging. Leaky homes and buildings had enough natural ventilation that a mechanical ventilation system was not always necessary. As building codes have shifted to build more energy efficient and tight buildings, the need for a good ventilation system is greater than ever.

Whether it's Negative, Positive or Balanced ventilation, Geary Pacific Supply has a solution for you!

WHITE-RODGERS NFC Compatible Universal Control Boards, Programmed with the White-Rodgers Connect App

50M56X-843

Universal single stage HSI integrated furnace control for PSC and ECMx blower motors. Includes a universal 120V nitride ignitor and utilizes the White-Rodgers Connect app for simple configuration and diagnostics.

WHITE-RODGERS
by COPELAND

- Configurable for either PSC or ECMx blower motors
- Reduce inventory by replacing over 550 part numbers
- Quick configuration (without power) and diagnostics with the White-Rodgers Connect app
- OEM harness detection, no additional harnesses required
- 120V Nitride ignitor included
- 7-Segment LED display provides unlimited configuration options
- Rollout accessory is not required
- Thermostat connector block for simple wiring

\$206.²⁰

50E47U-843

Universal hot surface ignition module. Designed to replace 24V, 120V or 240V non-integrated Hot Surface Ignition (HSI) modules in a wide variety of heating applications.

WHITE-RODGERS
by COPELAND

- Compatible with 24V, 120V and 240V ignitors
- Universal replacement for Fenwal, Honeywell, UTEC, ICM, White-Rodgers, and Robertshaw
- Energizes an inducer motor and monitors a pressure switch
- Use with the White-Rodgers Connect app to simplify configuration without power, prior to install
- See operation status, diagnostics and real time flame current with the on-board digital display which also provides alternate configuration
- Easy-install harness converts old board wiring
- Use F67-8535 (sold separately) to maintain temperature without an external thermostat in infrared and tube heaters

\$200.¹⁷

50D50U-843

All-Spark universal intermittent pilot/direct spark 24V ignition module. Integrated NFC for configuration and diagnostics using the White-Rodgers Connect app. Replaces over 1000 24V IP + DSI part numbers.

WHITE-RODGERS
by COPELAND

- Configurable for both 24V intermittent pilot and direct spark ignition modules
- Streamline inventory by replacing over 1000+ 24V IP/DSI part numbers
- Quick configuration without power and simple diagnostics with the White-Rodgers Connect app
- 7-Segment display provides additional configuration options and expanded fault code message reporting
- Rajah and spade spark terminals on-board eliminate the need for an external adapter
- Applications include gas furnaces, water heaters, boilers, cooking and laundry equipment, unit heaters, infrared and tube heaters
- Easy install harness converts old board wiring to fit All-Spark

REFRIGERANT RECOVERY

Turn in your reclaim tanks at **NO CHARGE** and earn store credit at Geary Pacific!

With the reduction in R410a production, reclaim is vital to ensure we have a continuous supply of refrigerant in the future.

Reclaimed R410a is exempt from the phase down. Meaning, the more we can reclaim the more R410a will be available and will help keep a more stable market cost!

California SB 1206: GWP Limits on Bulk HFCs

With the passing of California Senate Bill 1206, the bulk sale of certain HFC refrigerants will undergo a restriction process over the next 5+ years. This law limits the sale, distribution and use of these Virgin HFC refrigerants based on their Global Warming Potential (GWP)

Certified reclaimed refrigerants are not impacted. Please refer to the information below for dates and restricted refrigerants that Geary Pacific Supply will remove from California inventory.

Beginning January 1, 2025, HFCs with a GWP greater than 750 that are not reclaimed shall not be used to replenish any leaks or otherwise service stationary equipment owned or operated by the state.

M099 (R438A) • R422 (Nu22B) • R410A • R134a • R404A

Geary Pacific Supply carries reclaimed R410A that can be used for state-owned or operated buildings.

Beginning January 1, 2025 - All buildings/Homes
Any HFC refrigerant that carries a GWP of 2,200 or higher.

M099 (R438A) -2,265 • R422B (Nu22B) -2,526 • R404A

Beginning January 1, 2030 - All buildings/Homes
Any HFC refrigerant that carries a GWP of 1,500 or higher.

M099 (R438A) -2,265 • R422B (Nu22B) -2,526 • R410A • R134a • R404A • R407C
